CHAPTER 4 · CONCEPT 5 · WORKSHEET

Kite & Trapezium — Practice

Section A is interactive. Sections B and C are written practice — check them against the separate answer key.

Objective (1 mark each)

Q1 · MCQ **[1]**

Which quadrilateral has exactly one pair of parallel sides?

(a) Trapezium (b) Parallelogram (c) Rectangle (d) Square

Q2 · MCQ **[1]**

The diagonals of a kite:

(a) are always equal (b) bisect each other (c) intersect at right angles (d) are parallel

Q3 · FILL IN THE BLANK **[1]**

In a trapezium PQRS with PQ ∥ SR, if ∠P = 105°, then ∠S = ______ degrees.

____

Q4 · MCQ **[1]**

A kite that is also a parallelogram is a:

(a) rectangle (b) rhombus (c) trapezium (d) square

Q5 · TRUE / FALSE **[1]**

In an isosceles trapezium, the non-parallel sides are equal.

True False

Q6 · ASSERTION–REASON [1]

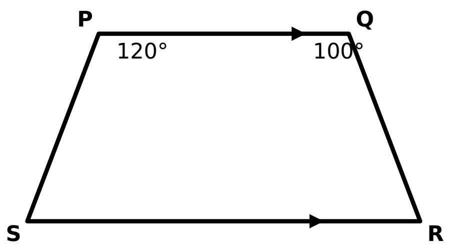
Assertion (A): Every kite is a rhombus.
Reason (R): A rhombus has all four sides equal.

(a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false
(d) A false, R true

Short answer (2 marks each)

Q7 · FIGURE [2]

In trapezium PQRS, PQ ∥ SR. Given ∠P = 120° and ∠Q = 100°, find ∠R and ∠S.



Q8 [2]

In kite ABCD (AB = BC, CD = DA), ∠B = 100° and ∠D = 40°. Find ∠A and ∠C.

Q9 [2]

State two properties of a kite.

Long answer (3 marks each)

Q10 **[3]**

In trapezium ABCD, AB ∥ DC. If $\angle A = 75°$ and $\angle B = 110°$, find $\angle C$ and $\angle D$, giving reasons.

Q11 **[3]**

One base angle of an isosceles trapezium is 70°. Find the other three angles, giving reasons.

Q12 · FAMILY **[3]**

Using the quadrilateral family, answer: (i) Which quadrilateral is both a rectangle and a rhombus? (ii) Is every parallelogram a trapezium? (iii) Is every kite a rhombus?

Total: 21 marks · Check your work against the answer key.
