

Rhombus — Practice

Section A is interactive. Sections B and C are written practice — check them against the separate answer key.

Objective (1 mark each)

Q1 • MCQ**[1]**

What type of quadrilateral has all sides of equal length?

(a) Rectangle (b) Square only (c) Rhombus (square is a special case) (d) Trapezium

Q2 • MCQ**[1]**

If the diagonals of a quadrilateral bisect each other at right angles, it is a:

(a) Rectangle (b) Rhombus (c) Trapezium (d) Kite only

Q3 • FILL IN THE BLANK**[1]**

The diagonals of a rhombus intersect at an angle of _____ degrees.

Q4 • MCQ**[1]**

One angle of a rhombus is 50° . Its opposite angle is:

(a) 50° (b) 130° (c) 90° (d) 100°

Q5 • TRUE / FALSE**[1]**

The diagonals of a rhombus are always equal in length.

True False

Q6 · ASSERTION-REASON**[1]**

Assertion (A): A square is a type of rhombus.

Reason (R): A square has all sides of equal length.

- (a) Both true, R explains A (b) Both true, R does not explain A (c) A true, R false
(d) A false, R true

Short answer (2 marks each)**Q7****[2]**

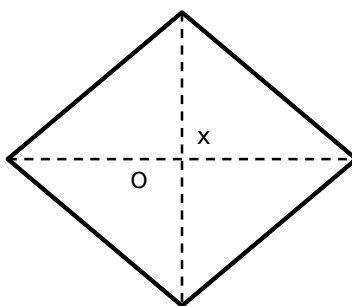

The diagonals of a rhombus are 6 cm and 8 cm. Find the length of each side.

Q8**[2]**

In a rhombus, one angle is 110° . Find the other three angles.

Q9 · FIGURE**[2]**

In the rhombus below, the diagonals meet at O. Find $\angle x$.

Long answer (3 marks each)

Q10

[3]

A diagonal and a side of a rhombus are equal in length. Find the measures of all four angles of the rhombus, with reasons.

Q11

[3]

The diagonals of a rhombus are 10 cm and 24 cm. Find the length of each side.

Q12

[3]

If a quadrilateral has four equal sides and one angle of 90° , what special quadrilateral is it? Justify your answer.

Total: 21 marks · Check your work against the answer key.
